COUNTRYSIDE NEIGHBORHOOD RECONSTRUCTION

Dear Resident:

Streets – concrete curb and gutter Installation

The concrete curb and gutter has been rescheduled for Tuesday, August 21, because of rain this week. The contractor is planning to start at the intersection of Crescent Drive and Westridge Blvd and will work north on the southeast side of the street, to Highland Road (both sides), and Hunter Street (both sides) and finish up back at the intersection of Crescent Drive and Westridge Blvd. Remaining curb and gutter work in the rest of neighborhood will be completed on Wednesday. Please do not park on the street while this work is being done.

Streets – concrete driveway apron installation

The contractor will notify you of the date and time when your concrete driveway apron will be installed using a doorknob hanger. From now on, check your front door each day for the notice. Remember, you cannot drive on the concrete for up to **7 days** while it hardens; therefore, please move your vehicle(s) out of the driveway before the work begins. You can park on the street in front of your house overnight and during the day while the concrete hardens. If the contractor needs you to move your car during the day you will be notified and told where to park. Once the contractor builds a gravel ramp to your driveway, you can begin to use it again as normal.

Please remember, schedules are weather dependent and are subject to change.

Communication

Please contact me if you have questions or comments regarding this project at 612-483-8362 or by email at jfrahm@EdinaMN.gov

The City of Edina and Palda & Sons, Inc. would like to thank you in advance for your patience and cooperation throughout the project.

Thank you,

Jeff Frahm, Engineering Technician
